

LABORATORY OF HOST PATHOGEN INTERACTION IN LENTIVIRAL INFECTION

INTERNATIONAL CENTER FOR RESEARCH IN INFECTIOUS DISEASES (CIRI)
LYON-FRANCE

POST DOCTORAL POSITION ON HIV RESEARCH

OUR LABORATORY is actively seeking for one highly motivated post doctoral candidate to work on the relationship between human immunodeficiency viruses (HIVs) and type I interferon responses, notably through the characterization of the role of specific interferon-regulated proteins in the viral life cycle. Over the recent years, our laboratory has characterized the antiviral role of some proteins belonging to the interferon response, particularly those that impact on myeloid cell infection. **THE PROJECT** for which the fellowship is awarded will deal with the characterization of novel antiviral effectors that we have recently identified through specific genetic screens and that are now awaiting for an in-depth mechanistic characterization.

THE CANDIDATE should possess prior experience in virology and/or cell biology and should be able to conduct his/her research independently. While previous experience in these fields is a plus, we also welcome candidates from other fields, motivated to make the transition to HIV research. We host people from different countries and our working language is English.

Funding is provided for 2 years by the French Agency for research on HIV/hepatitis (ANRS) and salary will depend on experience.

The laboratory is hosted within the CIRI, an institute dedicated to multi-disciplinary research in infectious diseases in Lyon-France. The CIRI provides an exciting and multi-cultural environment in which to carry out research, with topics that range from immunology, bacteriology to virology. The Institute provides state-of-the-art facilities that will be used to carry out the project.

Candidates should visit our homepage (<http://ciri.inserm.fr/en/team/all-teams/host-pathogen-interaction-during-lentiviral-infection/themes-research/>) and send their application, as well as the name of referees, to the following address:
