### **Post doc position in immuno-virology**

The team Molecular Basis of Viral Pathogenicity is currently looking for a post doc for a 1-year contract that is immediately available. The team is involved in deciphering the high pathogenesis of viral hemorrhagic fever viruses and notably Ebola, Marburg, Nipah and CCHFV. We are seeking motivated scientists to reinforce the team and accelerate the current ongoing projects.

#### **Profile :**

- PhD in Virology, Immunology or Molecular Biology
- Excellent technical skills in cell and molecular biology. Ideally with skill in flow cytometry and qPCR.
- Strong communication skills in English (oral and written) are important (English spoken in the team)
- Ability to work independently and as a part of a team
- Demonstrated ability to solve problems
- Excellent organizational and time management skills

#### **Position :**

The position is funded by ANR grants for one year until end 2020 and is available immediately. The salary is based on INSERM grid for postdocs

Candidates should submit their application with CV and cover letter to Viktor Volchkov ([viktor.volchkov@inserm.fr](mailto:viktor.volchkov@inserm.fr)) and Olivier Reynard ([olivier.reynard@inserm.fr](mailto:olivier.reynard@inserm.fr)).
